

On login page, please use admin as login and admin as default password (admin/admin)

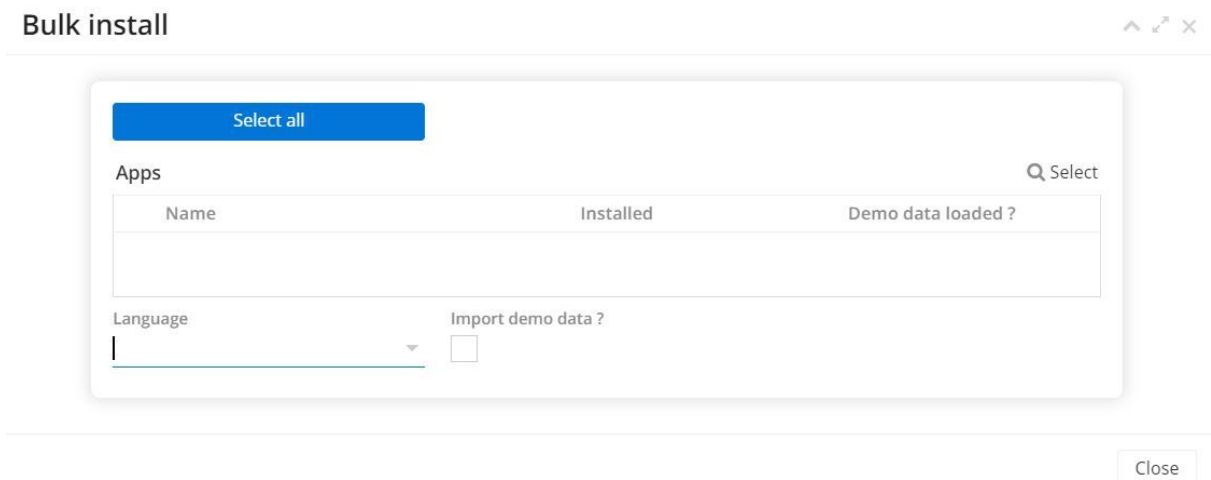

The image shows the Axelor login page. At the top, the Axelor logo is displayed in a grey box. Below the logo, there are two input fields for login: one for the username (containing 'admin') and one for the password (containing four dots). Below these fields is a checkbox labeled 'Remember me'. A blue button labeled 'Se connecter' is positioned below the 'Remember me' checkbox. At the bottom of the page, the copyright notice '© 2005 - 2018 Axelor. All Rights Reserved.' is visible.

Once you are login, you need to install the applications.  
You need to go in "Application config", in "Apps management" and then click on "**Bulk install**" button in the taskbar.

If you want to install all the applications, click on **“Select all”**.

You can also choose only the applications you want by clicking on “Select” icon and then select the applications you want to install.

If you want to **import the demo data**, check the corresponding box, and choose the language of these demo data.

You can then click on “Install” to start the installation of the applications.
